

Reverse Osmosis tanks are constructed using FDA approved materials. The water storage chamber is assembled using a polypropylene liner, a high grade chlorobutyl diaphragm and a patented stainless water connection. In addition, every diaphragm is post cured to remove any harmful materials or chemicals prior to assembly. This ensures tasteless, odourless and contaminant free water.

FEATURES

- Patented stainless steel water connection
 - High grade chlorobutyl diaphragm
 - Polypropylene liner
- Smooth internal construction prevents diaphragm abrasion damage
- Two part epoxy primer, polyurethane paint finish
 - NSF 58 approved
 - CE approved
- Comprehensive testing
 - Maintenance free

SPECIFICATIONS

Max temp 40°C
 Max working pressure 100 psi
